1 Studio Session Analyser

1.1 Welcome

Thank you for purchasing the Studio Session Plugins (bundle) which includes the **Studio Session Analyser**

The Studio Session Analyser is a light version of our renowned [FLUX:: Real Time Analyzer System](#)

The Session Analyser is installed as a single application. It has the same basic functioning as with the standard FLUX:: Analyser with the following limitations;

- Inputs & Outputs : Mono / Stereo
- I/O Configuration: SampleGrabber Plug-in Only (no hardware I/O)
- Max 96kHz sample rate. 44.1, 48, 88.2, 96
- No Support for any add-on options

Please note that the Studio Session Pack license is a bundle license and the Studio Session Analyzer can only be used on the same computer as the rest of the plug-ins in the bundle are used.

1.2 User documentation

Please refer to the [FLUX:: Real Time Analyzer System](#) user documentation.
